PROFILE SUMMARY

Senior Frontend Developer with **7+ years of expertise** in building **high-performance, responsive web applications** using **React.js, Vue.js, and modern CSS frameworks**. Proven track record of converting **Figma/PSD designs into pixel-perfect, scalable UI solutions** while ensuring cross-browser compatibility. Adept at driving **performance optimization and clean code practices**. Expert in **integrating AI-augmented workflows** to accelerate development lifecycles, reduce technical debt, and deliver exceptional **user-centric digital experiences**.

TECHNICAL SKILLS

- Front-End:** HTML5, CSS3, SCSS, Tailwind CSS, JavaScript, jQuery, Bootstrap
- JavaScript Frameworks & Libraries:** ReactJS, VueJS, NextJS
- CMS & Page Builders:** WordPress, Elementor, WPBakery, DIVI, WordPress Theme Customization
- Design Tools:** Figma, Photoshop
- Workflow & Project Management:** Browser Testing, Performance Testing, Git, GitHub, Bitbucket, Trello
- AI & Developer Productivity:** AI-Assisted Coding (GitHub Copilot, ChatGPT), Prompt Engineering, AI-Driven Performance Optimization, and Intelligent Code Refactoring.

PROFESSIONAL EXPERIENCE

Rlogical Techsoft Pvt. Ltd. | Sr. Frontend Developer Mar 2021 - Present

- Led frontend development for 12+ web applications, mentoring team members to improve code standards and reduce layout bugs by 30%. Engineered high-performance architectures, consistently achieving 90+ Lighthouse scores for 85% of projects.
- Integrated AI-powered development assistants into the team's workflow, reducing boilerplate coding time by 20% and enabling faster prototyping for client stakeholders.
- Leveraged a suite of AI-powered coding tools (Cursor, Kiro, GPT) to streamline development workflows, including automated code refactoring, performance optimization, and rapid prototyping for complex web projects.

Creole Studios | Web Designer Aug 2019 - Dec 2020

- Accelerated development cycles by 15%** for 8 Next.js/React projects and **optimized workflows** by integrating version control best practices, resulting in a **20% increase** in mobile user engagement.
- Delivered 10+ high-impact mobile redesigns** and interfaces, leveraging collaborative version control environments and modern coding templates to ensure rapid deployment and consistent UI/UX quality.

Bliss Web Solution Pvt. Ltd. | Web Designer Nov 2018 - Jun 2019

- Eliminated the need for external CSS frameworks** by developing custom, pixel-perfect WordPress sites directly from PSDs, reducing design-related fixes by **25%** and streamlining the development hand-off.
- Standardized design efficiency** by establishing unified style guides for 5 major accounts, cutting weekly update times by **3 hours per project** through high-accuracy, framework-free implementation.

Mercywell Medart | Jr. Web Designer & WordPress Developer Jun 2016 - Oct 2018

- Acted as a Strategic Technical Consultant**, directly gathering client requirements and suggesting optimized layouts that enhanced competitive positioning and increased average session duration by **15%**.
- Executed 100% mobile-responsive WordPress conversions** from PSD designs, refactoring core CSS/HTML to reduce code bloat by **20%** for easier weekly updates and faster performance.

PROJECTS

Viktor Vrecko Architect

- Delivered a pixel-perfect bilingual website with smooth animations and enhanced mobile usability, achieving a cleaner scrolling experience and high-end visual clarity for architectural layouts.
- Leveraged AI tools (Cursor, Kiro) to engineer custom JavaScript solutions, ensuring precise alignment with complex client requirements and architectural design standards.

Smartek

- Built scalable frontend modules for enterprise workforce systems using a forward-compatible architecture that reduced future Vue 3 migration effort by an estimated 50%.
- Optimized enterprise dashboard codebases via AI-driven refactoring and ChatGPT-assisted migration from Vue 2 to Vue 3, significantly reducing technical debt.

Blak

- Developed 10+ interactive case study layouts with custom animations, ensuring 100% visual accuracy to the original artwork while maintaining smooth mobile performance.
- Optimized UI components for a mobile-first experience, contributing to a 20% improvement in page-load speed for high-resolution image galleries.

Dhill Finance

- Built a high-performance WordPress site using Elementor and modular UI components, maintaining **100%** design fidelity while reducing content update time by **30%** and improving overall site usability.

HeroGo

- Developed a scalable UI using Tailwind CSS with **20+** reusable components, which increased the team's speed for building future pages by **25%**.
- Delivered a pixel-perfect, responsive design that achieved a **90+** Google Lighthouse performance score by optimizing custom CSS and assets.

Massa Dubai

- Developed clean, responsive layouts for **8** core website pages, ensuring a seamless and consistent experience across all mobile and desktop devices.
- Proactively suggested a refined UI alternative to the original artwork, which was approved by the client and led to a faster project sign-off.

KEY ACHIEVEMENTS

- Delivered **20+** responsive, high-performance web applications for international and local clients, achieving a **95% satisfaction rate** through precise design implementation.
- Boosted site performance and user experience by implementing advanced frontend optimization strategies, consistently achieving **90+ Google Lighthouse scores**.
- Led technical communication for **15+** key accounts, bridging the gap between business requirements and technical execution to ensure **100% on-time delivery**.
- Accelerated overall development velocity by **20%** by integrating AI-assisted coding tools (Cursor, GPT) into the project lifecycle, significantly reducing boilerplate time and enabling rapid prototyping.

EDUCATION

MCA (6.5 SPI) GLS ICT, Ahmedabad	2014-2019
BCA (6.5 SPI) HJ Doshi ITI, Jamnagar	2011-2014
